(03-2018) MPPS V21 NEVER LOCK Checked for months...no ... If you have other data
.... If no data.... I don't have any data. So I don't know how to do it. I don't want it done
that way. I want it done in a data-driven way, so I need you to do it the way I describe in
my post. I just need a way to test it. I don't have any data on this right now. So I need to
know if it can be done based on data. Here is my answer if it can be done based on data.
