I have recently tried to install the theme and it failed to install. It will not even start without giving an error. I am currently running Windows 7 Ultimate and version 7.71 of MacWally. Have you received a solution to my problem? Here's a screenshot of the error I receive: "An error occurred while attempting to install the theme. The theme may not be compatible with the current version of the software. Please download and install a new version of the theme and try again." Normally the theme should not stop working if it is compatible with the new version of Windows 7. If you have a backup of the file or have it on your desktop, please give us a try. I have not tried MacWally 8.0 yet. Sorry, but if you give us a chance to try to fix the problem, we will try to look into

Check out our previous theme reviews: Windows 7 Theme - Antivirus 2006 Windows 7 Theme - Antivirus 2006 Description: Windows 7 Theme is a powerful tool which allows you to customize your Windows desktop, right at the very first sight. It provides you with full control over the appearance of your desktop. We have not found many desktop themes before, so we decided to provide one of the first, Windows 7 Theme. The best thing about this theme is that you can copy it to any other computer and it will have the same behavior. Windows 7 Theme is a powerful tool which allows you to customize your Windows desktop, right at the very first sight. By default, the application loads a set of wallpapers. All you need to do is to grab any of them in the program and use it as your desktop background. Moreover, you can change the visual appearance of the display. For example, you can turn on and off transparency, change the color of the title bar and select a color for the inactive icons on the desktop. On top of that, the application provides you with a control panel with which you can change the placement and position of the photographs on the desktop. This way, you can place wallpapers in the center, left and right of the screen, and even in a horizontal or vertical configuration. Windows 7 Theme Features: Colors The main controls have a cool white color. The graphics' font and icons have a greyish color. Note: The application looks similar to the regular 'My Computer' tool in Windows XP. However, it has many new features which come in handy for people who are used to Windows 7. Customization Every single picture in the theme is fully customizable. By default, the application loads 15 wallpapers. But it can show you more. You can either choose from 8 wallpapers or import your own photos. In the latter case, you need to select the photos you want the theme to use. You can import them in one of two ways.

---

Either you can select them directly in the program and use the copy function to save them on the desktop. Or you can drag and drop them from your file manager. However, you should keep in mind that Windows 7 Theme has a low memory footprint. Therefore,
