Click the left mouse button to move the cue ball. Hold 'Ctrl' to hold your shot and line up the target line. Click the left mouse button again to let go and make your shot. The "Trick Shot" game has been play tested and works well. I have uploaded a demo version on my website. Please have a look. For those of you who cannot see the youtube version, you can find a screencap of it at My first roguelike. Map layout is done in tileset, named "Tachyon". You get a weapon when you enter a room, that is randomly chosen. Weapons are: razor, fire, ice, acid, poison and electricity. You have to defeat the boss at the end of each level. In every level you can hold and start several actions at the same time. You can use [enter] to enter to the next level, [esc] to quit, [store] to activate a feature such as a secret room, store, and of course [plotter] to activate a plot. There is a tutorial included in the game. It shows the various game features in a non-threatening way. What's new:

Under Iron Water is the first studio album released by Hindenburg, a hip hop duo featuring Smoke DZA and Thes One, after being founded in 2007 in Santa Monica, California. In December 2009, it was officially declared as a double album, because its original length was split into two split albums in the Internet (there's two UIC Forum threads) and on American record shops, with Iron on one CD and Water on the other. Under Iron Water has received favourable acclaim from nearly every mainstream music review website and blog. It debuted at number 17 on the U.S. Billboard 200, selling about 13,000 units. Background Smoke DZA and Thes One met in 1995, when Thes One was an Intersect Radio DJ in Los Angeles. Thes One and Smoke would later form a group named All Authors, who would later become known as well-known 'Tech N9ne affiliate' group, Monoxide. After releasing a few songs with All Authors, the two created The Document. Although no longer signed to Death Row or record label, The Document was still able to re-appear occasionally. It was before the release of the first The Document album that DZA and Thes One created a sort of planned double-album study. Originally, The Document began as a 6-part study with the first two parts titled, 'Water' and 'Iron'. Each of these parts had 6 songs split between them and named after Far-Western terminology for describing water - Talkin' Water (Talkin' Iron) and Indestructible Water (Indestructible Iron). A few other artist and fans (such as Tech N9ne and Pro Era) learned of these parts and became enthusiastic about them. At first, The Document planned to release the first part (Water) by February 2009. This was later changed when DZA felt that the idea would cause "too much of a problem," as the project itself attempted to stay away from "any loosely structured sound." When The Document saw how much of a problem Overcast and Across The Track would cause to the project, it decided to only release the first part on December 9, 2009, followed by the other part (Iron) by February 20, 2010. The two parts were split on each CD because of the length of a record and availability of space. Recording The majority of Under Iron Water (the songs that Thes One and Smoke DZA wrote) was recorded during the summer of 2009 in

Camera Obscura is a game featuring a comic book cover by comic book legend Tim Hamilton. A death-defying couple, physically intertwined within and out of one another, will pursue a dangerous journey through the city of San Francisco in pursuit of one another in the most personal form of competition. Their opponent, a mysterious assassin, will stand in their way. The couple, in the end, is left with their last struggle to protect their love from a mysterious antagonist. Reviews Touch Arcade - "To say that you need to try this game out to believe it is an understatement. It's pretty much impossible to overstate just how incredible this game is, and when you play it you'll be clued in almost immediately on how Camera Obscura came to be. So, what you may ask is, just how much would you be willing to spend on a game like this? Well, while I've seen it priced at almost double or triple the price of most of the other games that have launched in recent weeks, it's really going to depend on how much you appreciate it, and even then, the decision to check this game out may cost a few dollars on its own. So, I guess my point is this: if you're a fan of this genre, there's a very good chance that you're going to want to pick this one up and check it out. If you're an app/game developer looking to branch out and try something new, there's a good chance you're going to want to check this one out." Gamezebo - "Camera Obscura is a wonderful, surprisingly fun little game with an authentic flavor of something great that we've never seen before, which is saying a lot. It's a neat concept with a great execution, and it feels real, which I appreciate. The gameplay alone is worth experiencing this title, but if the pre-rendered character models start to seem a bit passé to you, don't despair. It's less cute, and more charming, in the true sense of the word." Gamezebo - "This is a game I can't wait to play again and again, and I feel that it will offer something really unique that other games lack. Camera Obscura is a breath of fresh air, and
