## **Elden Ring [April-2022]**

6.0 Character - You can freely change the gender of your character. - Customize the appearance of your character and your equipment. - Increase your strength and magic power through customization. - You can freely determine the name and appearance of your character. - The game allows you to fight without having to endure interruption. - An ensemble is possible. With 6.0, the character customization that was introduced in the previous update was greatly improved. The content that was added to the character customization function was expanded, and it was improved even more. By emulating the mastery of the blacksmiths in the present day, this update has incorporated new techniques and equipment into the world, and it has expanded the type of equipment that you can be equipped with. The strength and magic power of your character can also be increased based on how you customize your character. ■ Co-development with popular TV anime actors The world of Drakengard 3 is connected to the real world. Many popular anime actors and actresses have appeared in the game, including Yuzuru Horiguchi, who plays the character of Tastain, Shintarō Asanuma, who plays the character of Gaines, and most recently, Yoshitsugu Matsuoka, who plays the character of Hijikata. For this reason, we have developed a new co-development system in collaboration with these actors and actresses. The world of Drakengard 3 has been equipped with dialog that was made with the intentions of expressing how these characters feel. If you express how you yourself would feel in the same situation, you will find that it is actually an enjoyable experience to experience the game. For this reason, I hope that you will be able to discover a new world in Drakengard 3. ■ New monster with not one but two appearances Drakengard 3 introduces a monster with two appearances for the first time. The appearance that is encountered as the final boss of the Chaos Labyrinth is different from the appearance that is fought during the Chaos Raid. The appearance of this new monster is rich in appeal as well. ■ Chain reaction has started again! We have finally decided to make the multiplayer function become live. This update will be followed by updates on a regular basis. All of the content in the previous updates will be made live. We apologize for the inconvenience, but we hope that you will continue to enjoy the game.
