The Laraan Original Soundtrack was composed, recorded and produced by victor riera (a.k.a. ras-gat-rak) in his "home studio" that he built, so after the completion of the game, several months later, he released the soundtrack. It featured three full-length tracks with rhythm guitar, bass, electric guitar, drums and voice samples. A LARAAN REVIEW Laraan is a brilliant game with a perfect use of its concept. Although, it does not really bring a new experience to the genre, it develops and satisfies many things which are essential in this kind of games. Even though we often comment about the lack of innovation in games, Laraan is a good example of how innovation can be used to the best benefit of the genre. This game is a short adventure for the player to work towards in three ways: to unlock every element of the story, to achieve the highest score, to complete the quiz. Each of them is what the player needs, and they are not mutually exclusive as they are all towards the same end, to reach the end of the game. The player needs to give their best to improve their score and finish the game in the lowest time possible. The elements that the player finds themselves in the game are totally different from each other and the order in which they appear is basically unimportant. In the game, these elements are puzzles. In fact, as opposed to what we generally think, a puzzle is not something that you work on a piece of paper or a big board like in Tetris, but something that affects the game on a personal level. There is no order or sequence in the elements that are available in the game. What the player is forced to do is to try and find

---

the solution. The concept of the game is based on the idea that this kind of game is like a maze, because as you progress and work on the puzzles, you reach a dead-end. So, you have to go back to the beginning and start over and again try to work on the puzzles to progress in the game. The game, by the way, does not have a direct route to the end. As you progress, it opens new directions or options for the player to try with new items or puzzles to overcome. Sometimes, it turns out that the puzzles you find to solve have no solution, they just give you the opportunity to pick from two doors, one which is better than the other, but there will always be

Christian Science (Tertiary Education) Bill 2013 Share The Tertiary Education (Development and Innovation) Amendment Bill 2013 (the Bill) was introduced into Federal Parliament in May 2013. The Bill is intended to facilitate tertiary education and innovation in Australia. It removes the Ministerial discretion to provide various Commonwealth assistance by providing assistance on a loan and loan guarantee basis where the balance of risks are managed appropriately. This will increase the amount of assistance given in many cases and the level of risk the Commonwealth incurs in providing that assistance. The Bill also removes controls on student enrolments for students with financial assistance on the basis of fulfilling the course's eligibility requirements.

I've got a small problem with the EZF tranny in my 98. I drive it at moderate speeds a couple times a week and get a "check engine" light on the dash almost every time. The dealer says it is being caused by something behind my tail lights. Any suggestions? The light is caused by the EZF system, but it is normal to have that operating at times. After a clean road drive, the EZF will self-off. The EZF (EZ Traction Function) is used to measure vehicle traction, and "feed" that information to the vehicle so that it will not over-correct. If the traction is really bad, and there is not enough electrical power, the EZF will attempt to engage power brakes. If the traction is just right, and the EZF doesn't supply enough power to engage power brakes, it will provide a warning light and the vehicle will self-off (you can safely drive your vehicle).
