This package is developed with a clear vision: to allow creating stylish collages, without having to write complex Python code. To create a good collage, you can choose one or more pictures to be included in the collage. In this way, the development does not involve to hard programming to create as the user can just play with the package options. The simplicity and the usage are focused in the balance of compactness, speed, easiness and the flexibility of the package. There is a clear flow of inputs and outputs where the user is prompted each time the user does an action. It offers easy control of the collage elements; it is also possible to add new elements, for example, for pictures that are not present in the selected pictures. The graph layout system is included in the package, thanks to which a collage 3a67dffeec
