History of AutoCAD AutoCAD is a commercial computer-aided design (CAD) and drafting software application. Developed and marketed by Autodesk, AutoCAD was first released in December 1982 as a desktop app running on microcomputers with internal graphics controllers. Before AutoCAD was introduced, most commercial CAD programs ran on mainframe computers or minicomputers, with each CAD operator (user) working at a separate graphics terminal. AutoCAD is one of the most popular CAD programs, being the most popular commercial CAD software program in use by users of desktop graphics terminals in the world, according to the market research firm IDC. Autodesk was founded in 1978 and began selling AutoCAD shortly thereafter. AutoCAD was first introduced as a desktop app on computers running the Macintosh operating system, with the first version released in 1982. Since then, AutoCAD has been released for use on mainframe computers, minicomputers and on the PDA and smartphone platforms. Autodesk was purchased by Autodesk in 1997. Q: VB.Net and Regular Expressions I am trying to translate a old VB.Net V3.5 project to VB.Net V4.0. I have a line in the code, which looks like this `Dim Model = "myvalue"` I'm looking to change this to `Dim Model as String = "myvalue"` The Model variable contains some text. When I try to run the line of code, I get an error saying Invalid expression term 'myvalue' Can anybody help me out?

A: You can use this instead: `Dim Model as String = "myvalue"` or `Dim Model As String = "myvalue"` VB.Net does not have a constant type, it is always string. If you need to compile a .NET 2.0 application, use: `Dim Model As String = ""myvalue""` or `Dim Model As String = """"myvalue""""` and not `"myvalue"`.

A: Make it a string, not a constant: `Dim Model as String = "myvalue"` You can then use it as ca3bfb1094

We investigated protein oxidation in the cerebral cortex of control and selenium-deficient mice (n = 6/group) of four different ages (21, 26, 30, and 39 days) and determined selenium and glutathione peroxidase activity in the mice. Protein carbonyl concentration, the oxidation index, and protein thiol content were also measured.
