How to use: Copy the whole url and paste in browser text area to open the file

You can also try

GSAddressBook Its like chrome Bookmarks and it works in most of browsers

You can add as many websites as you like and it will save them Follow the instruction given above in comment to install the extension I dont like it

---

because it adds an icon to the bookmark bar but you can remove it like this...

Open Bookmarks > Menu > Edit Bookmarks You can edit the url and remove the number from the url Note:

We are not hosting any website and these links are used only for verification purpose. If you want to remove that page from this blacklist then please send mail to [removeme@superuser.com](mailto:removeme@superuser.com)Q: Datepicker value

---

is showing as 24 hours format in my picker I am using datepicker in my jsp page. The date is saved in database as 23 hours format, however, it is showing as 24 hours format in the dialog box. I need to show this as 23 hours format (e.g., 5:00:00 pm). Please suggest some solution for this. The following is the code I am using :- `$(".datepicker").datepicker({ dateFormat:`

---

```
"mm/dd/yy", changeMonth:  
  true, changeYear: true,  
  yearRange: '-110:-10',  
dateFormat: 'dd/mm/yy' });
```

Here is the screen shot for the same :- A: Try set the format of the date in JavaScript before opening the datepicker, since the date format is taken from the datepicker options.

```
$(function() { var date =  
  new Date();  
date.setHours(0, 0, 0, 0); da  
te.setDate(date.getDate() -
```
