A sexy dragon dancer, a wizard, a sorceress, a powerful witch, a goddess, the keeper of the old ways, a monster, and a vampire, these sixteen cards form a new song within the Tiles format. Playable in any game of Rival Books of Aster. How to get the Content: If you are new to purchasing content from RockPaperShotgun, you can find out more information here: [How to Buy DLC](#) Playing this style of game is quite different from traditional card games. I tend to do the "all in" closeout as I need to, and want to get the last punch in. And I pick off my opponents on the way down, with the not so secret art of retreat. High level matches, for a lot of the players anyway. If you're finding it difficult to get to the top of the ladder just take a bit longer to play, and you'll improve just fine. Just wait a few years for your hand to get good, get your money together for this expansion pack, and get your decks set up. Try this for a bit, then start focused practice. In a year or two you can bust out with this deck and be having a great time. Played through chapter 1 (I did score a 1-0 victory) this was really easy once I realized I need to play differently than I usually would. I also had some fun with the freebie "20 Sassy" card, considering how I usually just go in all in :) All in is a pretty good style of gameplay but it's good to know that you can always retreat with the "Celestial Retreat" card which is a good improvement from just going all in. Note that although it looks like you have only 8 commons, it actually has 12 just like the paid add on. This expansion pack is very good. I wanted to like this expansion pack as I really enjoy its style of gameplay, but the AI keeps on playing really poorly with these kinds of decks. It's not like other people's AI don't do the same either, so I think it might be a bad card pack. I've never found a game like this before, simple, no complication, just you and some other player/house. You can make set-backs as you can have cards removed or shuffled in play. The art is pretty good, the real draw is the gameplay. I hope somebody comes along and realizes this. I d41b202975
