On-ball action, particularly in the midfield, will be key to success in Fifa 22 Activation Code. This is due to the key, smart AI routines that take place at the moment of the kill (towards the end of a ball attack) that will make key passes to teammates significantly more likely. FIFA 22 takes player individuality to the next level by bringing each player's personal traits to life, adding personality and intelligence to their on-field behaviour. For example, one player's powerful shot will make them more likely to shoot at goal as you would expect, but they will also be more willing to try unorthodox shots. All players have a unique style of play in FIFA 22. Key Features: Loadout Customization - Choose from a variety of new items including boots, gloves, shorts and shirts. This will help personalize your team from the off. More Replays - Analyse each individual touch of a ball with the ultimate goal to unlock the intricacies of the game and 'see' how the game is played. Intuitive Controls - An extensive new playbook allows you to quickly pick and choose your team tactics, with game-changing substitutions and fluid possession control at your fingertips. New Referee - The referee will be completely customizable. You'll be able to pick up the rules and use the in-game video coach to learn how the game is played and to improve your refereeing skills. Enhanced Team AI - AI works on a different level, with various new AI routines. New Freekicks - Collect the ball from almost any place you wish within the penalty area and get it out of the stadium. Put your boots on the pitch to take a hard header. New Curling Routes - Perform curling passes by swiping the direction of the curl to a nearby teammate. Fluid Play - Performing a skilled pass is now quicker and easier. Breaking Tackles - Interact with the ball like a human player to seamlessly progress the ball in a manner that

would have previously been impossible. New Key Passes - Key passes are now more available, as players who are receiving an assist will be more likely to aim the ball over a defensive line. The defenders will be equally aware. Elusiveness - Start a run as if you were a human player and a defender will still be expecting

What's new:

- ***World-Class Players.*** Big-name players like Neymar and Lionel Messi made big headlines when they signed with Barcelona and Real Madrid earlier this year, but EA has spent the past two years developing FIFA's roster to include stars more representative of the entire world. Every player on the FIFA roster contains data showing what position they play, their attributes, style of play, and more.
- ***Smart Pass.*** Is your friend dribbling up the field? Does your rival always manage to deliver a killer cross over the top? Select players within a passing zone to send them through killer pass tactics, send a precise pass, or collect a perfectly timed pass to send your teammates into the perfect position. These assists will take you to new heights.
- ***Over Pass.*** Every time you pick up the ball and pass, your team will have a chance to win the ball back. If you pass to the right, defenders are forced to mark the ball with their entire body – reducing the chance that an opponent will

steal your prize possession.

- **Headers.** Let the team you lead have the ball! Win it back by scoring or intercepting a cross from the field or a corner kick.
- **Skill Shots.** Do you want to hit a volley or a chip? Choose from a wide or close-range shot to rack up accuracy bonuses and rack up the Fear Factor. Every successful shot earns you points and more skill shots will earn more points, guaranteeing success with this deadly shot.
- **Open Play.** Drop back and play a wide, narrow or central position. Attack or defend - the choice is yours.
