A number of alternative CAD programs were available from the 1980s, but most of them were designed to be run on mainframe computers. In 1987 Autodesk released AutoCAD Activation Code LT, a version of AutoCAD designed for use by a single person or small team, on a desktop PC or network of PCs with internal graphics controllers. It could be run either as a desktop or network app. By 1993 Autodesk was selling Autodesk Certified Design Suite, a version of AutoCAD with additional features and tools. In May 2001 Autodesk released AutoCAD 2000, an update that brought a number of new features and enhancements, including improvements to modeling and rendering, and new tools. Autodesk acquired a Chinese design company called LeadTools in 2002. The AutoCAD 2000 family of products was renamed AutoCAD in July 2002. In April 2010 Autodesk announced that they would start selling AutoCAD and Inventor, as part of a new "AutoCAD Productivity Suite". Autodesk is now one of the top five software companies in the world, and by 2014 it sold over $5.8 billion of software and services and has over 15,000 employees. History [edit] Autodesk Inc. was founded in 1982 by Gary Kildall, an entrepreneur who had created CP/M in the 1970s and the first commercial graphical user interface operating system, and Ed Beem, a former Walt Disney Animation Studios employee who had helped Kildall create CP/M. Michael Parker (Vice President, Marketing), Glenn Kibbe (Vice President, Sales), and Paul Montgomery (Vice President, Product Development). The original software from which Autodesk developed was called GraphicsDraw, and Kildall was the first customer. Its first office was at 1205 Pennsylvania Ave. NW, Washington, D.C. By 1985, the software had expanded from being a CP/M-based product to supporting Apple and Microsoft platforms. In 1985, Autodesk purchased the rights to distribute its own software outside North America. In 1989, Autodesk announced the purchase of Planar Systems, makers of the early vector graphics software Digital Publishing Suite (DPS). AutoCAD 1.0 was released in December 1982,
